

Angle Drill

D10YB (10mm chuck, variable speed)

For impressive manoeuvrability in tight spaces, Hitachi's D10YB Angle Drill is hard to beat.

The D10YB has an extremely low head clearance — a mere 83mm. The lightweight and compact design, with small circumference housing and recessed chuck, allows for excellent control in confined spaces.

To add to its versatility, the D10YB features a convenient reverse switch and a dial-in variable speed control, enabling it to tackle a wide range of applications with ease.
