

High-Speed Drill

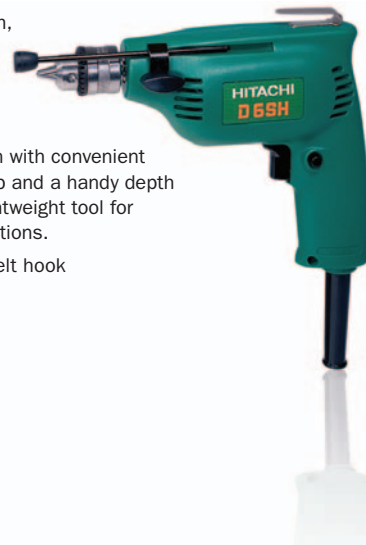

D6SH (6mm chuck)

A great model for high-speed work.

This unit spins at 4500 rpm, making it the ideal tool for coachbuilders and others who have a large number of small rivet holes to drill.

All ball bearing construction with convenient features, such as a belt clip and a handy depth stopper. This is a super-lightweight tool for specialist industrial applications.

Supplied with chuck key, belt hook and stopper.
