

## Rotary Hammer Drill

DH30PC2 30mm, SDS+

3-mode hammer drilling, drilling, breaking

A great model from Hitachi, providing strong performance up to 30mm in concrete.

Utilising the universal SDS+ bit system, this compact unit is fitted with a safety clutch to prevent damage should a jam occur when drilling.

Featuring 3 operating modes – drill only, hammer drill, hammer only – the DH30PC2 is a great all-round performer. In hammer-only mode the chisel or cutter can be locked at the preferred angle prior to operation.

With its shock-absorbing handles, 'soft touch' grips, and efficient hammer mechanism, this unit is a pleasure to operate.

Supplied with robust carry case.
